Vinyl flooring made with the latest composite extrusion technology. Encapsulating exceptional functionality making your vinyl more durable and comfortable.

- MOISTURE RESISTANT
- UV RESISTANT
- SCRATCH RESISTANT
- ANTI-SLIP
- MOULD RESISTANT
- STAIN RESISTANT

BEFORE INSTALLATION

Please examine flooring material for colour and quality prior to installation. If material is unacceptable, do not install and replace them immediately. Please ensure job site environmental, substrate and subsurface conditions meet all requirements as outlined in installation instructions prior to substrate testing and flooring installation. Manufacturer do not bear responsibility for product performance or installation failure that are due to structural, substrate or environmental deficiencies or job site conditions.

- ✗ Undesirable/defective pieces should not be installed. Flooring warranties do not cover materials with visible defects once they are installed. Owner and installer are responsible for final inspection of flooring quality and grade. ***Please retain carton label and invoice for records.**
- ✓ Flooring installation should be scheduled after all other trades have completed their work.
- ✓ Unopened cartons of flooring should be stored flat and neatly stacked in the climate controlled installation area for a minimum of 48 hours prior to installation to allow product to acclimatise.
- ✓ When installing flooring from two or more cartons, check the pattern, color and batch (lot) numbers on the carton to ensure they are all from the same batch. This information is listed on the exterior label of each carton. It is recommended to blend flooring from multiple cartons during installation.
- ✓ Excess flooring pieces should be stored in a protected climate controlled environment for future repairs if necessary.

BENEFITS OF VINYL

DURABLE
Low shrinkage + expansion

COMFORTABLE
Nature wood design and texture for touch of comfort

PET FRIENDLY
Comfortable underfoot for pets and scratch and stain resistant

LOW MAINTENANCE
Simply sweep, vacuum or mop to keep surface clean

NON-TOXIC
Formaldehyde Free

CLICK DESIGN
Easy installation and good lock strength

SHORT DOWNTIME
Quicker installation with shorter acclimation hours

TAKE YOUR PICK!

Choose from 13 nature-inspired shades that are bound to match the style of your ideal interior.

- Shade and design variation
- Size: 181mm x 1220mm x 5mm

FLOOR PROTECTION & INITIAL MAINTENANCE

1. Following installation and cleanup, protect vinyl tile by laying sheets of breathable brown cardboard paper over the flooring and then a layer of plywood sheets. Leave until the work of all trades has been completed. ***It is advised to have installation done after all trades have been completed.**
2. Allow the adhesive to dry for 24 hours before any traffic or furniture set foot on your vinyl floor.
3. Do not, at any time during the initial maintenance or thereafter, flood the floor with water or maintenance solutions.

DAILY MAINTENANCE

Best Practices for Preventing Damage

- Spills should be cleaned up immediately.
- Clean the floor with nonabrasive floor cleaner.
- Never push, pull, or drag furniture across vinyl floors. Always lift and carry.
- Heavy furniture or appliances that are not moved often should be equipped with flat, non-staining floor protectors.
- Avoid using a vacuum with a beater bar.
- For spot stain treatment, use a diluted bleach solution that is 5% bleach, 95% water.
- Avoid flooding the floor

EXTRA PROTECTION

Invest in high-quality floor mats for an extra layer of protection. Place the mats at entrances and exits to collect and trap corrosive substances that can be tracked in, such as dirt, sand, oil, grit, asphalt, and even driveway sealer.
